1. Introduction

1.1 Project Description

Boardwise is a web-based digital ecosystem designed for board game enthusiasts. It provides a single platform where users can discover new board games, build personal collections, participate in community discussions, organise events, buy and sell games through a marketplace, and receive recommendations.

The platform combines several services into one application, allowing users to manage their board gaming experience without relying on multiple websites or applications. Whether users are looking for rulebooks, local events, gaming communities, or marketplace listings, Boardwise provides a unified and intuitive experience.

The application has been developed using modern web technologies with a focus on usability, accessibility, and scalability.

1.2 Project Objectives

Boardwise aims to create a comprehensive digital platform for the board gaming community by providing:

- A centralised board game library.
- Community spaces for discussion and collaboration.
- Event discovery and management.
- A marketplace for buying and selling board games.
- AI-powered assistance for recommendations and gameplay support.
- Personal collections and profile management.
- A responsive interface that supports desktop, tablet, and mobile devices.

The primary objective of the system is to improve how board game enthusiasts discover, organise, share, and enjoy board games through a single integrated platform.

2. Manual for All Users

2.1 Landing Page

Page Function

The Landing Page serves as the entry point to the Boardwise Digital Ecosystem.

From this page, visitors can:

Learn about the Boardwise platform.

Explore the application's key features.

View highlighted content.

Navigate to the login page.

- Create a new account.
- Access additional information about the project.

The landing page provides a concise overview of the ecosystem while encouraging new users to register and existing users to sign in.

Page Visual

2.2 Login

Page Function

The Login page allows registered users to securely access their Boardwise account.

Users are required to enter their registered email address and password. Once authenticated successfully, they are redirected to the main application.

If incorrect credentials are entered, an error message is displayed prompting the user to try again.

2.4 Navigation Bar

Page Function

The navigation bar provides quick access to the primary features of the Boardwise platform.

Depending on the user's permissions and authentication status, the navigation bar may include:

- Home
- Library
- Communities
- Marketplace
- Events
- Profile
- Settings
- Notifications
- Logout

On smaller devices, the navigation bar automatically adapts into a mobile-friendly navigation drawer to improve usability.

Page Visual

2.5 User Profile

Page Function

The User Profile page displays the user's personal information and account details.

Users can:

- View their profile information.
- Update personal details.
- Manage profile preferences.
- View activity associated with their account.

Page Visual

2.6 Notifications

Page Function

The Notifications page displays important updates generated by the Boardwise platform.

Notifications may include:

- Community invitations.
- Marketplace updates.
- Event reminders.
- System announcements.

Users can review recent notifications and stay informed about activity relevant to their account.

Page Visual

3. Library

The Library module serves as the central repository for board games and rulebooks within the Boardwise Digital Ecosystem. It enables users to discover games, search for specific titles, view detailed information, and access uploaded rulebooks.

3.1 Library Home

Page Function

The Library Home page provides users with a searchable catalogue of board games available on the platform.

From this page users can:

- Browse available board games.
- Search for games by name.
- Filter games using available filter options.
- View game details.
- Access associated rulebooks where available.

The page is designed to make discovering games simple while allowing users to quickly narrow results using the search and filtering tools.

3.2 Searching for Games

Page Function

The search bar allows users to locate games quickly without manually browsing the full catalogue.

To search for a game:

1. Navigate to the Library page.
2. Click inside the search field.
3. Enter the name or partial name of a board game.
4. Matching results will automatically appear.

Searching reduces the displayed games to those matching the entered search criteria.

Page Visual

3.3 Filtering Games

Page Function

Filters allow users to narrow the library catalogue according to specific characteristics.

Depending on available data, filters may include:

- Categories
- Genres
- Player count
- Playing time
- Difficulty
- Publisher

Multiple filters can be applied simultaneously to refine the displayed results.

Users may also clear all filters to return to the complete catalogue.

3.4 Viewing Game Details

Page Function

Selecting a game opens the Game Details page.

This page provides detailed information including:

- Game title
- Cover image
- Description
- Categories
- Playing time
- Recommended player count
- Publisher information
- Available rulebooks

The details page allows users to better understand the game before deciding to purchase, play, or join related communities.

3.5 Rulebooks

Page Function

Many games include downloadable or viewable rulebooks.

Users may:

- Open a rulebook.
- Read the rulebook online.
- Download the rulebook (where available).
- Search for additional uploaded versions.

If no rulebook has been uploaded, the system informs the user accordingly.

Dragonmaster

Contributor: IAmR3al

Date of Issue: 7/30/2026

Description

Dragonmaster is a trick-taking card game based on an older game called Coup d'État. Each player is given a supply of plastic gems, which represent points. Each player will get to be the dealer for five different hands, with slightly different goals for each hand. After all cards have been dealt out, the dealer decides which hand best suits his or her current cards, and the other players are penalized points (in the form of crystals) for taking certain tricks or cards. For instance, if "first" or "last" is called, then a player is penalized for taking the first or last tricks. All players will get a chance to be dealer for five hands, but other players can steal this opportunity by taking all of the tricks during certain hands. At the end, the biggest pile of gems wins the game. Jewel contents: 10 clear (2 extra) 14 green (2 extra) 22 red (2 extra) 22 blue (2 extra)

3.6 Uploading Rulebooks (Authorised Users)

Page Function

Authorised users may contribute additional rulebooks to the platform.

To upload a rulebook:

1. Open the relevant game page.
2. Select **Upload Rulebook**.
3. Choose the PDF document.
4. Provide the required information.
5. Submit the upload.

After successful validation, the rulebook becomes available to other users.

Page Visual

The screenshot shows the Boardwise website interface. At the top is a navigation bar with a menu icon, the 'Boardwise' logo, a search bar, and links for 'Ask AI', 'Library', 'Marketplace', 'Community', 'Events', 'Profile', 'Chat', and a 'Logout' button. The main content area is titled 'Library' with the subtitle 'Browse community rulebooks'. Below this is a search bar and an 'Upload Rulebook' button. A modal window titled 'Upload a Rulebook' is open in the center. The modal contains the following fields: 'Title' (a dropdown menu showing 'Die Macher'), 'Edition' (a text input field with 'version 2'), and 'Language' (a text input field with 'english'). Below these fields is a section titled 'Rulebook Upload' which includes an 'Upload Rulebook PDF' button, a 'Cancel' button, and an 'Add' button. To the right of the 'Add' button, there is a preview of a rulebook titled 'Introduction to Compiler Design (Undergraduate Topics in -- Torben Aegidius Mogensen_ SpringerLink (Onl.pdf)'. The background of the page shows a 'Popular Rulebooks' section with a 'Monopoly' rulebook and a 'Recommended' section with a 'BOAT LUD' rulebook.

3.7 Expected Behaviour

The Library module should provide:

- Fast search results.
- Accurate filtering.
- Responsive layouts across desktop, tablet, and mobile devices.
- Easy access to game information.
- Convenient access to available rulebooks.
- Clear feedback when no matching results are found.

4. Communities

The Communities module enables users to connect with other board game enthusiasts by joining interest-based communities. Within a community, members can participate in discussions, share information, organise events, and interact with other players.

The module provides tools for discovering communities, creating new communities, inviting members, participating in discussions, and managing community information.

4.1 Community Explore

Page Function

The Community Explore page displays all communities that are available to the user.

Users can:

- Browse available communities.
- View community information.
- Search for communities.
- Filter communities.
- Create a new community.
- Open a community to view additional information.

Community cards provide a summary of each community, allowing users to quickly identify communities that match their interests.

4.2 Searching Communities

Page Function

The search functionality allows users to locate communities quickly.

To search for a community:

1. Open the Communities page.
2. Select the search bar.
3. Enter the name of the desired community.
4. Matching communities will be displayed automatically.

The search updates dynamically as the user types, allowing communities to be found without reloading the page.

Page Visual

4.3 Filtering Communities

Page Function

Community filters allow users to narrow displayed communities according to specific criteria.

Available filters may include:

- Public communities
- Private communities
- Game categories
- Community interests

Users may select multiple filters simultaneously.

Selecting **Clear Filters** restores the complete community list.

Page Visual

4.4 Viewing Community Details

Page Function

Selecting a community opens the Community Details page.

This page provides users with detailed information including:

- Community name
- Description
- Banner image
- Visibility status
- Category
- Member count
- Upcoming events
- Community administrators

Users can decide whether to join the community based on the displayed information.

Page Visual

4.5 Joining a Community

Page Function

Users may join communities to participate in discussions and events.

To join a community:

1. Open the desired community.
2. Select the **Join Community** button.
3. Wait for confirmation.

For public communities, membership is granted immediately.

Private communities may require approval from a community administrator before membership is granted.

Once a user has joined a community, additional functionality such as chat participation and event interaction becomes available.

Page Visual

4.6 Community Chat

Page Function

The Community Chat allows members to communicate in real time.

Members can:

- View previous messages.
- Send new messages.
- Participate in ongoing discussions.
- View messages from other community members.

Only authorised members may post messages. Users who are not members may be restricted to viewing community information until they join.

Page Visual

4.7 Community Members

Page Function

The Members section displays users who belong to the community.

Information displayed may include:

- Profile picture
- Username
- Member role
- Community administrator status

Users can browse the member list to identify other members participating within the community.

Page Visual

4.8 Community Events

Page Function

The Events section lists activities organised within the community.

Users may:

- View upcoming events.
- Read event information.
- Open event details.
- Join scheduled events.

Community events help members coordinate board game sessions and other community activities.

4.9 Creating a Community

Page Function

Users may create new communities using the **Create Community** option.

To create a community:

1. Select **Create Community**.
2. Enter the community name.
3. Provide a description.
4. Select a category.
5. Choose the visibility (Public or Private).
6. Upload a community image if required.
7. Submit the form.

Once created successfully, the new community becomes available within the Communities page.

Page Visual

The screenshot shows the Boardwise website interface with a 'Create Community' modal form open. The modal is titled 'Create Community' and contains the following fields and options:

- Community Name:** A text input field.
- What is this community about?:** A text area for the description.
- Category:** A dropdown menu.
- Visibility:** Two radio buttons labeled 'Public' and 'Private'.
- Upload image:** A button with a plus icon and the text 'No file selected'.
- Buttons:** 'Cancel' and 'Create' buttons at the bottom right of the modal.

The background shows the Boardwise homepage with a search bar, navigation links (Library, Marketplace, Community, Events, Profile, Chat, Logout), and a 'Community' section with filters and a list of communities.

4.10 Editing a Community

Page Function

Community administrators may update community information.

Editable information may include:

- Community name
- Description

- Banner image
- Visibility
- Category

Changes become visible immediately after they have been saved successfully.

Page Visual

The screenshot displays the 'Boardwise' app interface. At the top is a navigation bar with a menu icon, the 'Boardwise' logo, a search bar, and links for 'Ask AI', 'Library', 'Marketplace', 'Community', 'Events', 'Profile', 'Chat', and a 'Logout' button. The main content area shows the 'Board Game Enthusiasts' group page. It features a group banner with board game images, a 'PUBLIC' status tag, a description 'A group for all board game lovers.', and buttons for 'Members (5)' and 'Events'. A chat window is partially visible on the left with a message from 'Thabo M.' and a 'Send' button on the right. A 'Create Event' modal is centered on the screen, containing input fields for 'Event name', 'Game', 'location', 'Date' (formatted as yyyy/mm/dd with a calendar icon), 'Time' (formatted as --:-- with a clock icon), and 'Event description'. The modal has 'Cancel' and 'Create Event' buttons at the bottom. Below the modal, a message states 'No upcoming events' with a calendar icon. At the very bottom, a red button labeled 'Create Event' is visible.

4.11 Inviting Members

Page Function

Community administrators and authorised members may invite additional users to join the community.

To invite a member:

1. Open the community.
2. Select **Invite Members**.
3. Search for the desired user.
4. Select the user.
5. Send the invitation.

Invited users receive a notification informing them of the invitation.

4.12 Responsive Behaviour

The Communities module is designed to provide a consistent experience across supported devices.

Desktop

- Multi-column community grid.
- Sidebar displayed alongside content.
- Chat and member information visible simultaneously.
- Search and filters displayed together.

Tablet

- Reduced number of community cards per row.
- Collapsible sidebar.
- Responsive spacing between interface elements.
- Chat layout adapted for medium-sized screens.

Mobile

- Single-column community cards.
- Navigation drawer replaces the permanent sidebar.
- Search displayed above community content.
- Filters accessible through a collapsible panel.

- Community chat displayed as a full-screen conversation.
- Dialogs resized to fit smaller screens.
- No horizontal scrolling.

Expected Behaviour

The Communities module should:

- Adapt automatically to different screen sizes.
- Maintain readability across devices.
- Preserve consistent navigation.
- Prevent horizontal scrolling.
- Ensure touch-friendly interactions.
- Maintain accessibility on desktop, tablet, and mobile devices.

5. Marketplace

The Marketplace module enables users to buy and sell board games through the Boardwise platform. It provides a central location where users can browse listings, search for specific games, create their own listings, and manage items they wish to sell.

The Marketplace is designed to encourage safe and convenient exchanges between members of the Boardwise community.

5.1 Marketplace Home

Page Function

The Marketplace Home page displays all available listings.

Users can:

- Browse available board games for sale.
- View featured listings.
- Search for listings.
- Apply filters.
- Open listing details.
- Create a new listing.

Each listing provides a brief overview of the item, allowing users to quickly compare available games.

5.2 Searching the Marketplace

Page Function

The search feature enables users to quickly locate specific board games.

To search:

- 1. Navigate to the Marketplace.
- 2. Select the search bar.
- 3. Enter the game name or keywords.
- 4. Matching listings will appear automatically.

The search updates dynamically as users type.

Page Visual

5.3 Filtering Listings

Page Function

Filters help users narrow marketplace results according to their preferences.

Available filters may include:

- Game category
- Price range
- Condition
- Availability
- Seller location

Users may combine multiple filters to refine search results.

Selecting **Clear Filters** restores all marketplace listings.

Page Visual

5.4 Viewing Listing Details

Page Function

Selecting a listing opens the Listing Details page.

This page provides comprehensive information about the item, including:

- Game title
- Images
- Price
- Description
- Condition
- Seller information
- Upload date

Users can review the listing before deciding to contact the seller.

Page Visual

5.5 Creating a Listing

Page Function

Users may create marketplace listings to advertise board games for sale.

To create a listing:

1. Navigate to the Marketplace.
2. Select **Create Listing**.
3. Upload one or more images.
4. Enter the game title.
5. Add a description.
6. Specify the selling price.
7. Indicate the condition of the game.
8. Submit the listing.

After successful submission, the listing becomes visible to other users.

Page Visual

The screenshot shows the 'Boardwise' Marketplace interface. A 'Create Listing' modal is open in the center, allowing users to add new board game listings. The modal contains the following fields and options:

- Listing Title**: A text input field.
- Game Title**: A text input field.
- Version**: A text input field.
- Genres**: A dropdown menu.
- Condition**: A dropdown menu.
- Item Type**: A dropdown menu.
- Sell/Rent**: Two radio buttons, with 'Sell' selected.
- Amount**: A text input field containing 'R 0'.
- Open to negotiation**: A checkbox.

The background shows the Marketplace page with a search bar, filters (genres, listing type, price range), and a list of existing listings. One listing for 'Monopoly' is visible, priced at R29.99. Another listing for 'Betrayal at House on the Hill' is also visible, priced at R300.

5.6 Editing a Listing

Page Function

Users may edit listings that they have created.

Editable information includes:

- Images
- Description
- Price
- Availability
- Condition

After saving changes, the updated listing becomes visible immediately.

5.7 Managing Listings

Page Function

Users can manage all of their marketplace listings from their account.

Available actions include:

- View active listings.
- Edit listings.
- Mark items as sold.
- Remove listings.
- Reactivate available listings.

Managing listings ensures that marketplace information remains accurate and up to date.

5.8 Contacting a Seller

Page Function

Users interested in purchasing an item may contact the seller directly through the platform.

The seller's information is displayed alongside the listing, allowing interested buyers to initiate communication regarding:

- Availability
- Collection arrangements
- Additional questions
- Negotiated pricing (where applicable)

Page Visual

5.9 Responsive Behaviour

The Marketplace module adapts automatically to different screen sizes.

Desktop

- Multi-column listing grid.
- Persistent filter panel.
- Large product images.
- Side-by-side listing information.

Tablet

- Reduced number of listing cards.
- Collapsible filters.
- Responsive spacing.

Mobile

- Single-column listings.
- Full-width search bar.
- Filters accessible through a drawer or bottom sheet.
- Optimised listing details with vertically stacked content.
- Large touch targets for improved usability.

Expected Behaviour

The Marketplace module should:

- Display listings clearly across all supported devices.
- Prevent horizontal scrolling.
- Maintain readable images and text.
- Support responsive search and filtering.
- Ensure forms and dialogs fit smaller screens.

6. Events

The Events module allows users to discover, create, organise, and participate in board gaming events. Whether users are hosting a casual game night or attending a larger community gathering, the Events module provides all the tools needed to manage participation and event information.

Events can be associated with communities or created independently, allowing users to connect with other board game enthusiasts both online and in person.

6.1 Events Home

Page Function

The Events Home page displays upcoming board game events available to the user.

From this page, users can:

- Browse upcoming events.
- Search for events.
- Filter events.
- View event details.
- Create new events.
- Join available events.

Events are displayed as cards containing essential information such as the event title, date, location, organiser, and participation status.
